

Mouse Brain SysQuan – Sex Effect on the Phospho–proteome

Cerebrum + BrainStem volcanoes and concordance / GO enrichment includes Cerebellum

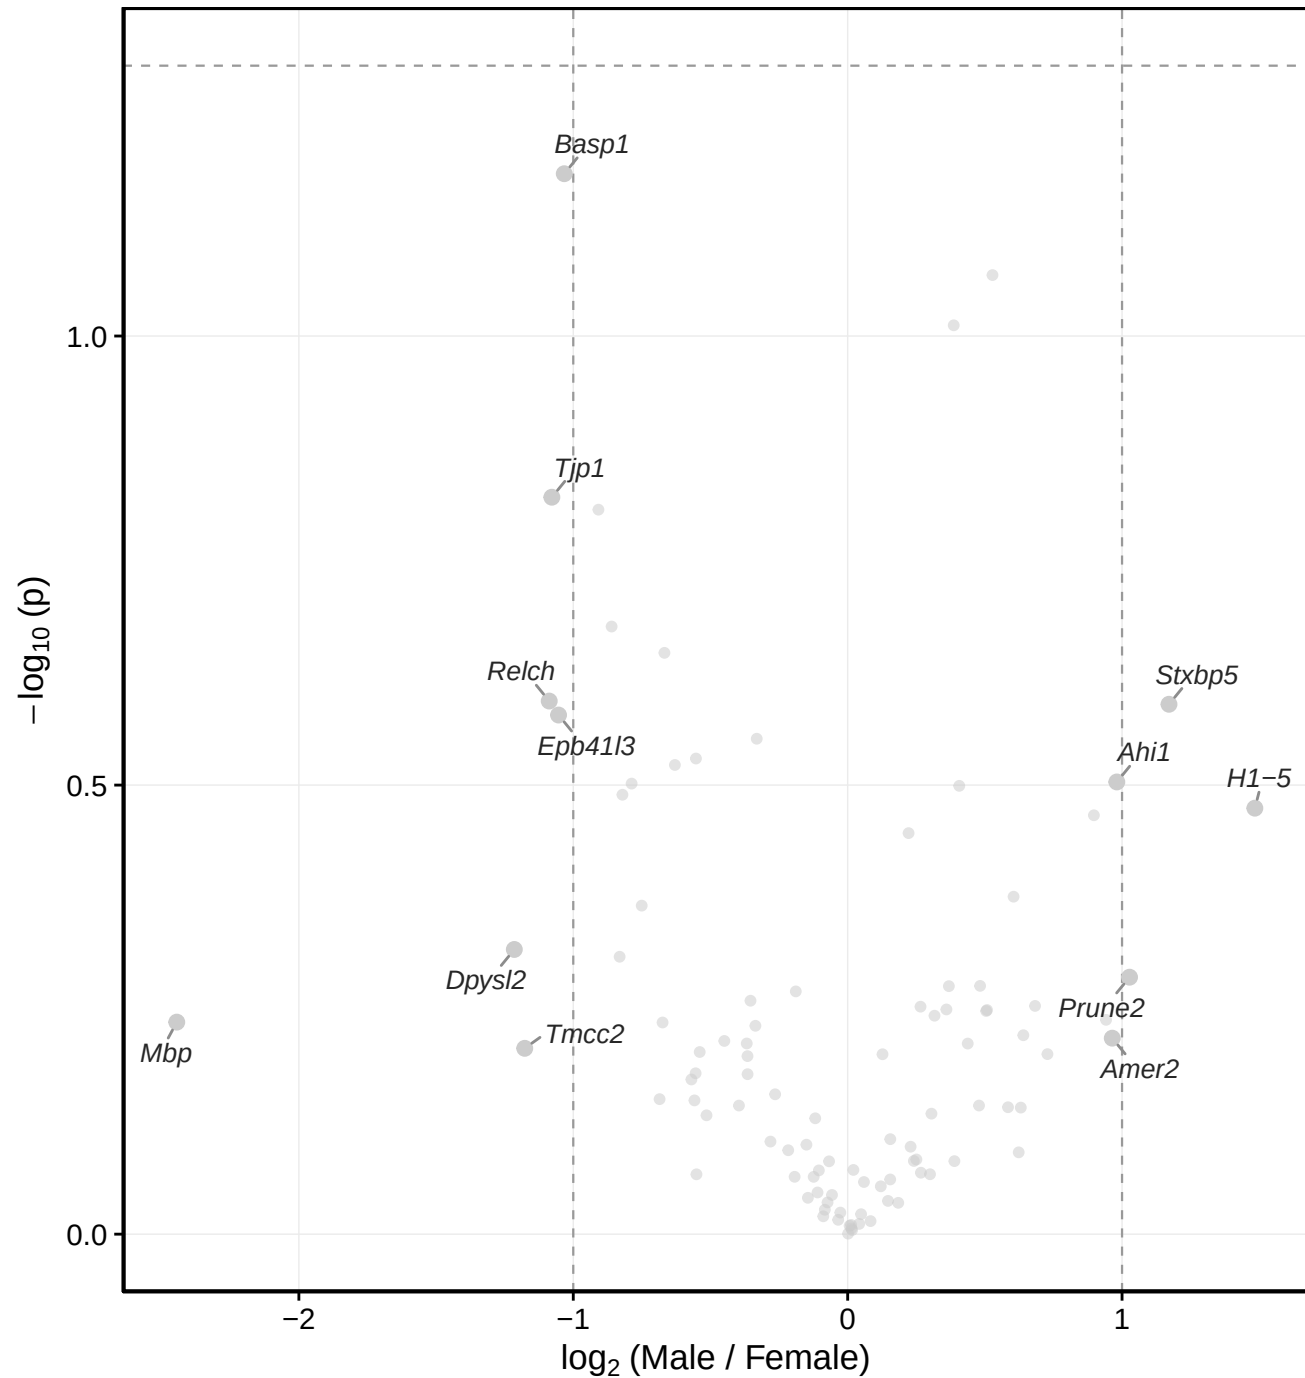

Cerebrum phospho: Male vs Female

131 phosphoproteins / batch-normalized heavy / top |log2FC| labelled

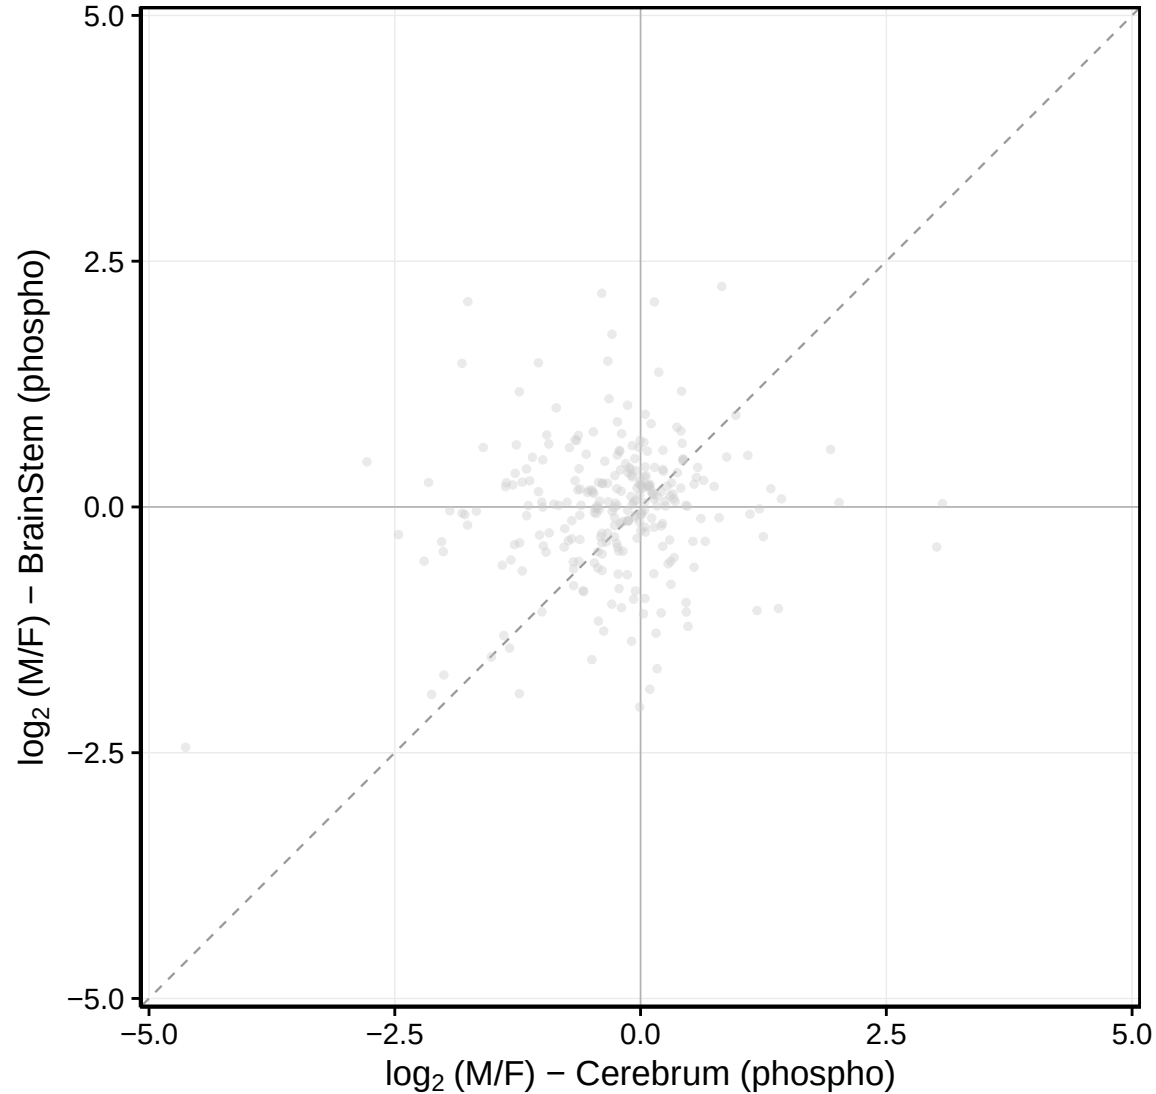

BrainStem phospho: Male vs Female

100 phosphoproteins / batch-normalized heavy / top |log2FC| labelled

Cross-region concordance of phospho sex effects

Diagonal = identical effect in both regions; sig. = peptide-level p<0.05 in at least one

GO enrichment – phospho sex-effect genes

BP / MF / CC top 5 each; 157 up-M, 456 up-F genes (Cer+BS+Cbl union, p<0.30 OR top 400 |log2FC|)
