

Mouse Brain SysQuan – Functional Enrichment

GO Biological Process enrichment of regional, sex, and phospho drivers

a

GO Biological Process – per-region (proteome)

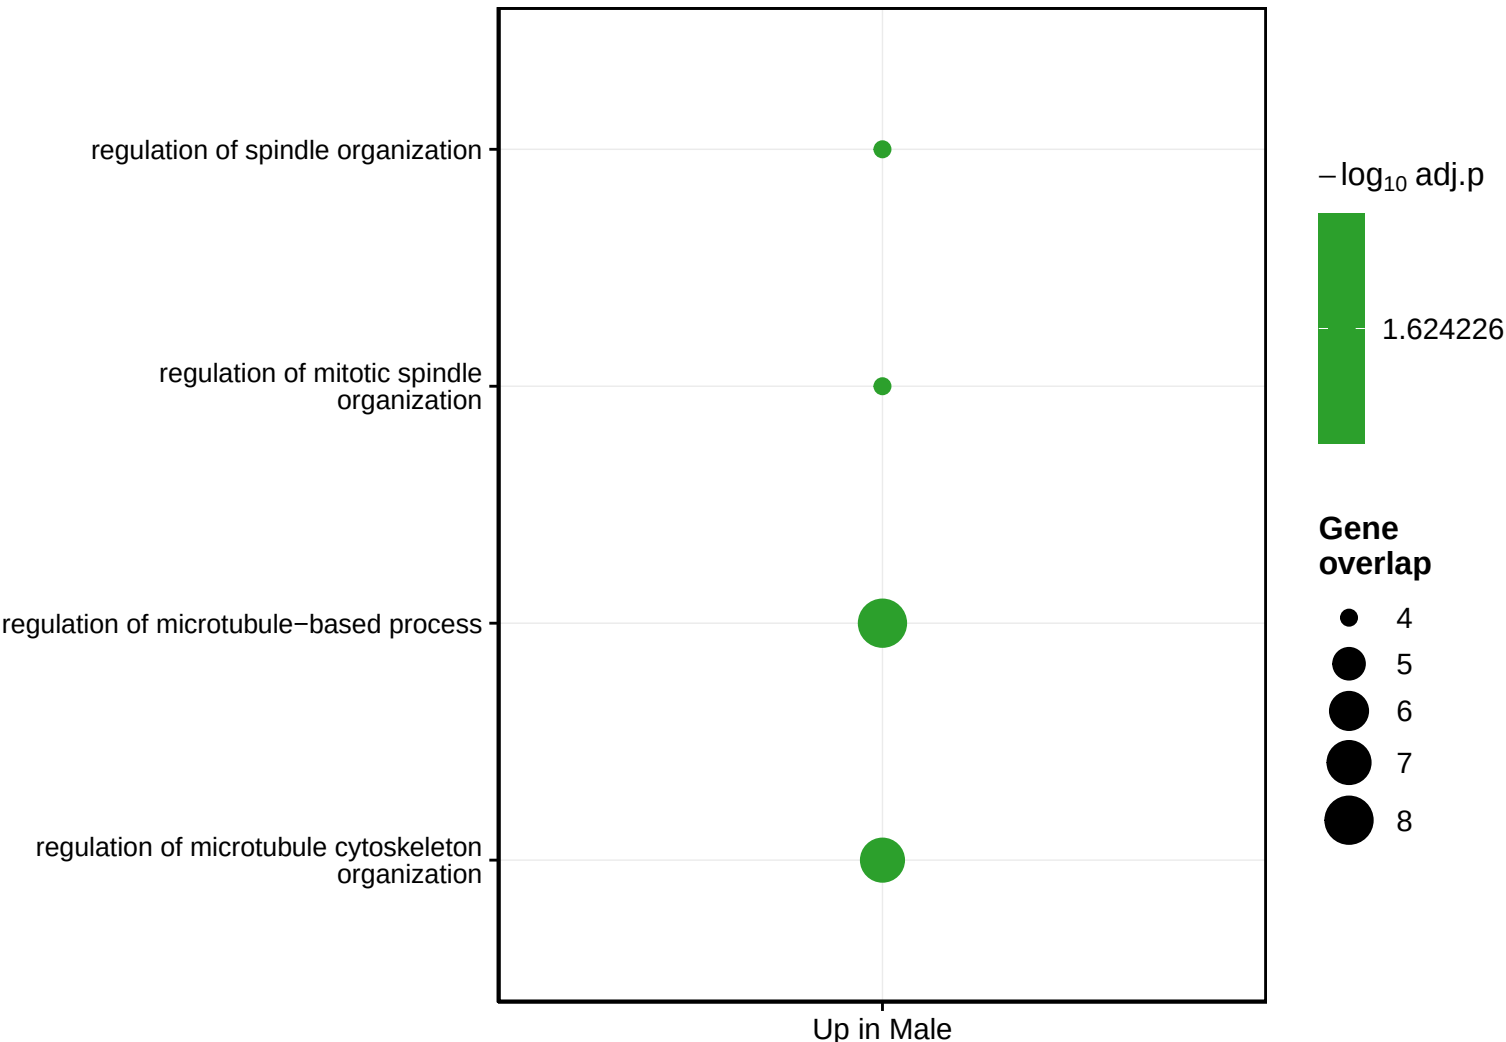

Top 4 BP terms per region (one-vs-rest, FDR<0.10)

b

GO Biological Process – sex direction (proteome)

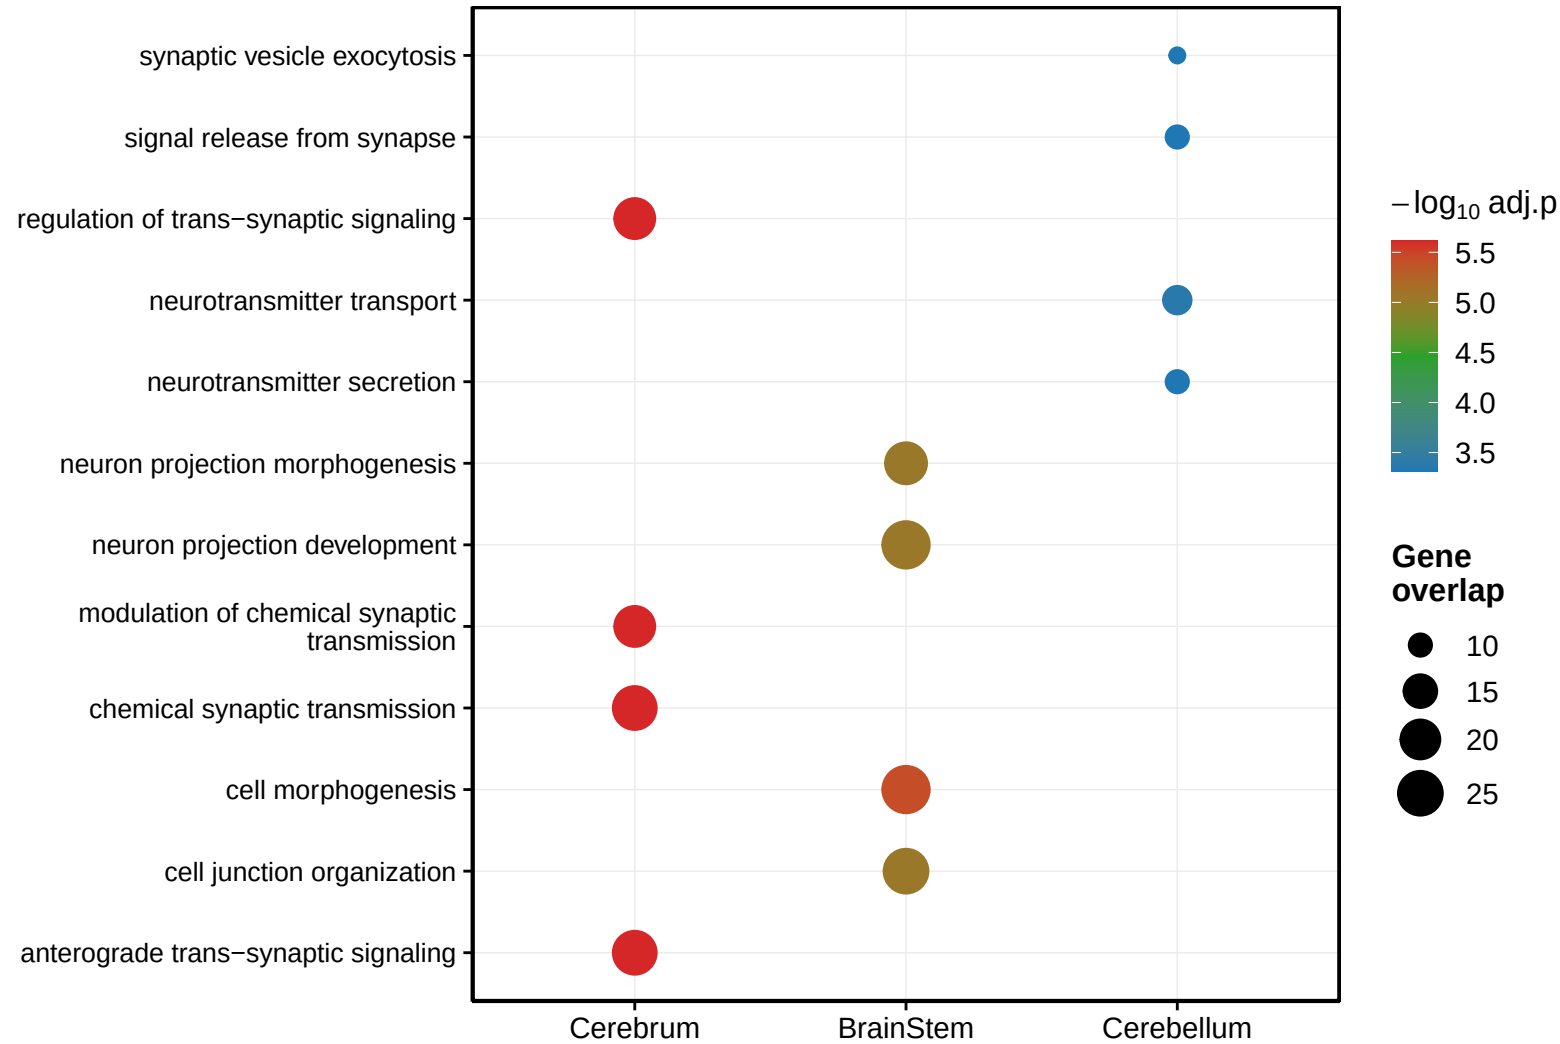

Concordant Cerebrum + BrainStem, 71 up-M / 52 up-F genes

c

GO Biological Process – phospho-region markers

Cerebrum, BrainStem, Cerebellum (FDR<0.25; small input lists)

d

Driver protein expression across regions and sex

Top region markers + top sex-concordant proteins / facets sorted low -> high median expression
